

Adam is an Associate and Project Landscape Architect involved in a number of the firm's site development and planning projects. His responsibilities on individual projects include site design relating to layout, planting and materials selection, grading, sediment and erosion control, hardscape, and lighting. He also provides direction on project permitting and represents several large projects before municipal boards.

Adam directs site plan and construction drawing preparation, participates in sediment and erosion control inspections and conducts landscape architectural construction oversight.

PROJECT HIGHLIGHTS

EDUCATION

Masters in Landscape Architecture,
City College of New York, 2014

PROFESSIONAL REGISTRATIONS

Registered Landscape Architect

- State of New York

PROFESSIONAL AFFILIATIONS

American Society of Landscape
Architects

Justice Sonya Sotomayor Community School: Yonkers, NY

- Insite provided engineering and landscape architectural services on the new community school. Built over the majority of a city block, the project design entailed accessible walking paths between key site and building features, planting and material selections. Adam worked closely with the architect and other project consultants on state approvals and construction documents.

The Hamlet at Carmel: Carmel, NY

- Insite provided engineering, surveying and landscape architectural services for a 150-unit multifamily residential development. The landscape design entailed accessible pedestrian facilities, public site amenities, site grading, and plantings across the 35-acre site. Adam worked closely with the project architect, and other project consultants to meet project objectives and regulatory requirements.

Sleepy Hollow Country Club Pool Complex Improvements: Briarcliff, NY

- Insite provided engineering and landscape architectural services on a full overhaul of the club's pool complex. The site improvements included two new swimming pools, a new sports court, and an outdoor dining and bar area, in addition to new accessible walkways throughout the site.

Camp Kaufmann Dining Hall: Pawling, NY

- Insite provided engineering, surveying and landscape architectural services on a new dining hall for the Girl Scout's camp. The landscape design components included site grading, new hardscape, accessible parking and walking routes, and planting design. Adam worked with the local Planning Board, and oversaw the site plan, special use, and erosion control permits.
