PROFESSIONAL AFFILIATIONS

American Water Works Association

Eric is a Senior Associate and Senior Project Engineer at Insite. Since joining the firm in 2006 Eric is responsible for engineering supervision and management of a number of Insite's civil engineering and site development projects. His roles in individual projects range from design, permitting and approval obtainment to construction oversight. Projects presently under Eric's direction include site layout, stormwater infrastructure and collection system design, hydrological analysis, water supply treatment and distribution design, and wastewater treatment system design for various residential, commercial and municipal projects.

Eric's specific area of expertise includes public water supply distribution / pumping / treatment systems and sewer collection / pump stations.

Eric primarily works in Dutchess, Putnam and Westchester Counties serving private developers, land owners, and municipalities.

PROJECT HIGHLIGHTS

Eastdale Village: Poughkeepsie, NY

- Insite provided a full array of design and permitting services for a mixed use development. Eric oversaw the design of the stormwater management and treatment systems as well as the water supply improvements and wastewater collection system. Eric was responsible for analysis of the existing sewer forcemain system with several existing pump stations and design and integration of two new sewer pump stations into the existing system for continued effective and efficient operation.

Town of Kent Route 52 Sewer: Kent, NY

- Insite provided a full array of surveying, engineering, and landscape architectural services for a new sewer system for a vital commercial corridor in the Town of Kent, New York. Eric was responsible for procuring the required permits, including a New York City Department of Environmental Protection wastewater treatment plant variance from the NYCDEP Rules and Regulations. Eric was also responsible for construction oversight and contract management of the construction contract.

Municipal Separate Storm Sewer System (MS4) Consulting: Various Clients, NY

- Insite has provided an array of MS4 consulting services to municipalities and schools throughout Putnam, Westchester and Dutchess Counties. Eric has been responsible for overseeing required inspections of stormwater collection and treatment systems and provided recommendations for system improvements and retrofits for improved stormwater treatment. Eric has overseen the completion of the annual report submitted to NYSDEC for compliance with the MS4 General Permit.

Somers Intermediate School Disinfection System: Somers, NY

- Insite provided design and permitting services for a chlorine disinfection system retrofit for a public water supply system serving the Somers Intermediate School. Eric was responsible for the design of the disinfection system to meet increased department of health requirements. Eric also provided construction oversight and coordination to minimize the down time of the water system.
