Professional Land Surveyors (Past  
Director)

New York State GIS Association

Nick is co-founder, Senior Vice President and Senior Principal Surveyor overseeing select land surveying and mapping projects at Insite. Over 30 years ago, Nick and his partner Jeff started Insite to offer their clients the highest level of professional guidance with unparalleled customer service.

With over 50 years of experience in the land surveying field, much of Nick’s experience is specifically targeted at surveying applications as they relate to civil engineering projects in both the public and private sectors.

Nick collaborates with a team of in-house personnel and field crews performing work throughout southeastern New York State.

Through his years of experience, Nick has become a respected member throughout the surveying community often consulted for specialized surveying projects. Nick has been responsible for a wide of array of projects ranging from monitoring historic buildings at West Point as they underwent foundation reconstruction to performing extensive urban route surveys for Con-Edison. Other assignments have involved monitoring seasonal and annual movement in area bridges, surveying for local airports and boundary and topographic mapping for Insite’s many golf and country club clients throughout Westchester County.

Nick remains on the forefront of technology executing numerous projects in the metropolitan area utilizing global navigation satellite system (GNSS) surveying and is responsible for implementation and integration of GIS related services for Insite as well as assisting in the development of Insite’s UAV (Drone) mapping program.

**PROJECT HIGHLIGHTS**

*West End Lofts: Poughkeepsie, NY*

- Insite provided the multi-family project with an ALTA Survey, survey, construction support and preparation of survey as-builts. Nick managed all aspects of the survey tasks meeting tight time frames and complicated title requirements.

*Putnam Hospital Center: Carmel, NY*

- Insite has supported the hospital with topographic and boundary surveys of the entire facility over the course of numerous expansion projects in the last 20 years, including additional land acquisition.

*Boyce Thompson Center: Yonkers, NY*

- Insite provided surveying for an innovative mixed use urban development. Nick managed project surveying support services from initial site surveying for design through construction.

*College of Mount St. Vincent: Bronx, NY*

- Insite provided topographic and boundary surveying for numerous individual campus improvement projects including building renovation, construction and utility mapping. Nick managed all surveying tasks performed for the 60 acre campus.
